SUMMARY

Flutter Developer with a passion for creating beautiful, efficient, and cross-platform mobile applications. Proficient in developing robust and scalable apps using the Flutter framework and Dart programming language. Skilled in UI design, Provider, GetX, BLoC, API integration, and Hive database. Experienced with Firebase for backend services. Dedicated to staying updated with the latest trends and best practices in mobile app development.

WORK EXPERIENCE

Clovion Tech Solutions Pvt. Ltd. (6 - Months Intern)

Matrimony App

Technologies Used: Flutter, GetX, RESTful API, SharedPreferences

- Developed a matrimony app using Flutter, Firebase, Provider, and API integration.
- Enabled profile creation, match searching, secure communication, and real-time chat.
- Implemented advanced search filters and secure authentication.
- Integrated APIs for dynamic content and optimized client-server communication.
- Debugged and maintained the codebase for a high-quality user experience..

Matrimony Admin App

Technologies Used: Flutter, GetX, RESTful API, SharedPreferences

- Designed and developed an admin panel application for managing matrimony profiles and monitoring user activities.
- Implemented features to approve or reject user profiles and manage reported accounts.
- Utilized Firebase for real-time data management and secure authentication.
- Integrated Provider for efficient state management across the app.

Personal Projects

Soul Whisper (Dating App - Ongoing Project)

- Developing a modern dating app using Flutter, GetX, Firebase, and BLoC with features like detailed profiles, matching algorithms, and real-time communication.
- It includes video profiles, location sharing, and user safety measures in a secure, customizable UI.

Weather Checker App

- Developed a weather app using Flutter, GetX, RESTful API, and SharedPreferences.
- Implemented state management, real-time weather fetching, user location, and custom UI components for an engaging experience.
